

IN THE UNITED STATES PATENT & TRADEMARK OFFICE

APPLICANT: ERNST B. RIEMANN, ET AL.

TITLE: LAN TELEPHONE SYSTEM

SERIAL No.: 10⁶/679,689

FILING DATE: October 7, 2003

GROUP: ART UNIT 2665

EXAMINER: Nguyen, Toan

To: Hon. Commissioner of Patents
P.O. Box 1450
Alexandria, VA 22313-1450

INFORMATION DISCLOSURE STATEMENT UNDER 37 CFR 1.97(c)

S I R:

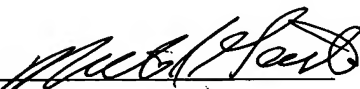

Please find attached form 1449/PTO citing Japanese Publication No. JP08-111629A and a copy and a partial translation thereof. This reference was cited by the Japanese Patent Office in the corresponding Japanese patent application.

Japanese Publication No. 111692A is a simple PBX adder which is used to extend the capabilities of an existing PBX by allowing workstations to connect through the LAN into the PBX. The PBX controls not only the PSTN interface and station interfaces, but also all of the switching of all calls. There is no way for the PBX adder of the Japanese reference to be setup as a standalone telephone system in the manner of the present invention. The present invention is a stand-alone system that entirely eliminates a conventional PBX and any need for it, since the present invention takes the place of a PBX based on the computer network. The present invention is implemented as a distributed

software application that is able to switch calls as asynchronous media streams across a data network between a plurality of telephones and PSTN gateways. Thus, in the system of the present invention all switching is performed by the data network rather than through traditional TDM (Time Divisional Multiplexing), where PBX functionality is provided through the software of the invention, with all end-points in the system of the present invention, such as telephone gateways and PSTN gateways, connecting to the data network and being controlled by the software of the present invention, in contrast to the system of Japanese Publication No. 111692A.

The fee under 37 CFR 1.17(p) is to be charged to deposit account number 13-4825.

Respectfully submitted,

By: 

Milton S. Gerstein
